About Us

LAMIT is one of the fast growing commercial brands in the world and the global supplier of Ceramic Roof, Tiles, Sanitary and Natural Cladding Stones, UPVC Pipes and Polymer Water Tank.

Our valued customers can purchase finest quality of water tank & UPVC pipes from us. These products are manufactured by taking best quality materials as per industry standards. We are using food grade materials to sustain purity of water and protect health of people. Extra ribs of the tank make it stronger.

Using of high quality ultra violet resistance factors on outer layer of the tank protects the colour of the tank without fade. The top lid of the tank helps to protect the water from the debris and unhealthy components. The high quality materials of the LAMIT ensure the elasticity of the body of the tank which avoids the possibility of damage while adhering plumbing materials to the tank.

PRODUCT RANGE

We are one of the leading manufacturers of U- PVC Pipes . These are widely regarded for their high quality and long life. Mostly used in underground plumbing applications and are specifically designed for long term functionality. We readily process bulk requirements.

Lead Contamination due to PVC pipes is one of the major contributing factors of groundwater pollution in India. It is important to identify the sources of such pollution and to devise methods to eliminate the contributing factors. Here Lamit comes with a solution by introducing Lead free UPVC Pipe for water supply.
